Jax Engel

Staff Product Designer & Design Engineer

Fort Worth, TX (Remote) | hello@jaxengeldesign.com | linkedin.com/in/jaxengel | jaxengeldesign.com

Summary

Staff Product Designer & Design Engineer with 11+ years of experience in design systems, design tokens, and enterprise tools. Builds the component libraries, Figma-to-code automation, and accessible patterns that unify multi-team products. Works across product design and front-end engineering to reduce UX friction and embed accessibility at scale.

Experience

Senior UX Engineer

Toyota | Contract | Plano, TX (Hybrid) | Oct 2025 – Sep 2026

- Built a design token library with a CLI. It holds 680 primitive and theme tokens and 120 component tokens for React, Angular, and Swift consumers.
- Designed the token taxonomy, rollout strategy, and adoption roadmap. The structure supports multiple brands, with Toyota and SCaFT supported today.
- Mapped 15 components to tokens in Figma. Created 12 epics and 200+ stories in bulk with Python and AI to plan the rollout to 40 SCaFT product teams across 10 web apps.
- Supported the teams building on PRIME, a React design system with 80+ components in production. Resolved integration blockers and coordinated releases in Storybook, GitHub, and Jira.
- Authored technical specifications, maintained Zeroheight documentation, and contributed to accessibility-compliant component design and code.

Staff UI/UX Designer

ServiceNow | Contract | Remote | Feb 2024 – Oct 2025

- Shaped the experience of an internal AI tool that groups survey responses into themes, as the sole designer. Manual analysis took 10+ hours per 100 responses. Leadership approved future work and assigned more resources.
- Designed for Oolong, the employee intranet design system drawn from Horizon, as one of two designers.
- Embedded accessibility into reusable patterns and design documentation to support designers across the org.
- Launched a shared component library that cut repetitive UI design by 60% and improved speed and consistency across design.

Senior Product Designer

Albertsons | Contract | Remote | Jun 2023 – Sep 2023

- Improved consistency and delivery speed across a merchandising platform serving 5,000+ stores. Shaped reusable components and documentation for the teams.
- Drove adoption across 20+ teams by aligning on shared patterns and guiding implementation within enterprise tools.

Senior Product Designer

ActBlue | Remote | Mar 2022 – May 2023

- Redesigned core admin and integration flows to simplify reporting and setup. Helped cut support costs by an estimated $1.5M annually.
- Partnered with engineers to scope complex integration logic and ensure clear error handling and sync visibility across third-party systems.
- Led accessibility efforts and documented inclusive patterns adopted across multiple product teams.

Senior Product Designer

Routable | Remote | Nov 2021 – Mar 2022

- Introduced batch actions and grouping features to bulk invoicing workflows. Financial power users completed tasks faster and with more efficiency.
- Reduced support volume by improving key flows based on interviews with small business clients. The changes closed usability gaps in core invoicing tasks.

Senior Product Designer

FireHydrant | Remote | Nov 2020 – Nov 2021

- Designed mission-critical incident management workflows for enterprise engineering teams (Spotify, Peloton, Snapchat) to reduce cognitive load during high-severity outages.
- Designed workflows for role assignment, communication handoff, and postmortem documentation to increase incident response efficiency.

UX Designer

Indeed | Remote | Feb 2020 – Oct 2020

- Designed shared UI patterns adopted across B2B and B2C products on web and mobile.
- Wrote component documentation for localization (English, German, Japanese, Arabic, Hebrew) with RTL guidance. Partnered with product and engineering to embed accessibility and responsiveness in design assets used by 100+ designers.

Senior UX Engineer

Visa | Austin, TX | Nov 2015 – Feb 2020

- Redesigned fraud investigation tools for enterprise clients to improve usability and flow efficiency across global teams. Led usability testing and alignment workshops that contributed to a 20% reduction in case resolution SLAs.
- Designed transaction reporting and tokenization workflows for e-commerce and omni-channel merchants, balancing regulatory needs with streamlined UX in complex fintech environments.

Case Studies

Toyota PRIME token system: jaxengeldesign.com/case-studies/toyota

AI-assisted survey analysis at ServiceNow: jaxengeldesign.com/case-studies/servicenow

Accessible, rebranded design system at Indeed: jaxengeldesign.com/case-studies/indeed

Self-serve Salesforce integration at ActBlue: jaxengeldesign.com/case-studies/actblue

Skills

Design Systems & Engineering: Design Tokens, Enterprise Token Taxonomy, Token Automation, Component Libraries, Multi-Platform Pipelines, Storybook, React, HTML, CSS, SCSS, Python, Technical Specifications

Product & UX Strategy: Enterprise Workflow Architecture, AI-Augmented Workflows, Accessibility (WCAG), Inclusive Design, Product Discovery, Usability Testing, User Research, Prototyping

Design Operations & Leadership: Cross-Functional Governance, Cross-Departmental Rollouts, Technical Documentation, Mentorship, Team Alignment

Tools & Platforms: Figma, FigJam, Zeroheight, GitHub, Jira, Confluence, Notion, Miro, Framer, Adobe Creative Cloud, Claude, Copilot, ChatGPT, Gemini

Education

The Art Institute of Austin | Bachelor of Fine Arts, Web Design & Interactive Media
